Dear Sir,

I would like to commend the following CSI teams members for their professionalism in completing the work scope, regarding the Solar Turbine Package on the Olero Creek OAGM barge.

- ❖ Simon Uchenna
- ❖ Uforma Oneju
- ❖ Glenn Gabourel

The job consisted of a unique set of challenges with the added difficulty of working in the swamp. The supervision of the job was exceptional and anything asked by the Solar Engineer was addressed immediately.

Several challenges arose, during the project, with design errors and last minute change in scope. Thereby having a direct impact to the termination details. However the manner in which the crew dealt with changes displayed a high degree of proficiency and skill. The years of experience at hand helped in achieving milestones and project goals. The resourcefulness of the CSI team with the resources available was invaluable. The Solar Turbine is at a point, where commissioning has been part completed and preservation is ongoing until next year.

Again I would like to express my sincere appreciation to CSI for all the assistance during the course construction and commissioning activities.

Sincerely

Gin Banwait Beng (Hons)
